To find the interest of any particular sum for any certain time, multiply the sum by the number of months, take one half of the product, and you will find the two right hand figures to be cents—the remainder, on the left hand, are dollars, which is the answer. If there be cents in the sum, after you have multiplied as above, you will find the two right hand figures to be fractions, the two next cents, and the remainder in dollars.

OGY COLLECTION

THE CONNECTICUT FARMERS' GAZETTE, AND HORTICULTURAL REPOSITORY.

THIS is a small weekly paper, published in New Haven, particularly for the benefit of those who are engaged in the cultivation of the soil. Its leading object is to collect and circulate facts and information on subjects relating to the management of farms and gardens; the treatment of crops; the raising of cattle, improvements in agricultural implements, &c. No paper of the kind has before been published in this State, and the Connecticut farmer has been entirely dependent on foreign publications for all his reading on subjects connected with his more immediate business and interests. The *Gazette* was established more than a year ago, and the publisher has the satisfaction to add, that it has been received with a good degree of favor by the farmers of the State. Its permanency has become a matter of certainty, and its usefulness is steadily on the increase.

 **Price, \$1** a year, *in advance.*

Subscriptions and communications thankfully received

ECLIPSES IN THE YEAR 1842.

There will be five Eclipses this year, in the following order, viz :

I. The first will be of the Sun, January 11th, at 11h. 27m. in the morning invisible to the inhabitants of N. America, by reason of the Moons south latitude.

II. The 2d will be an eclipse of the Moon, Jan. 26th, at 1h. 2m., in the afternoon, consequently invisible to us.

III. The third will be an eclipse of the Sun, July 8th. at 2h. 13m. in the morning—to us invisible. This eclipse will be visible and total in many parts of Europe and Asia.

IV. The fourth will be of the Moon, July 22d, at 6h. 9m. in the morning—to us invisible. The Moon will set a few minutes before the eclipse begins.

V. The fifth will be of the Sun, Dec. 31st, at 2h. 14m. in the afternoon—invisible to us by reason of the Moon's south latitude. This eclipse will be visible in South America, and the adjoining oceans. In lat. $33^{\circ} 18' S.$, and long. $104^{\circ} 21' W.$, it will be central and annular at noon.

1217026

The Planet Venus (♀) will be morning Star until the 5th of March, then evening Star till the 8th of December, then morning Star again.

☞ To find the interest of any particular sum for any certain time, multiply the sum by the number of months, take one half of the product, and you will find the two right hand figures to be cents—the remainder, on the left hand, are dollars, which is the answer. If there be cents in the sum, after you have multiplied as above, you will find the two right hand figures to be fractions, the two next cents, and the remainder in dollars.

ECLIPSES IN THE YEAR 1843.

There will be three Eclipses this year, two of the Sun, and one of the Moon.

I. The first will be an Annular eclipse of the Sun, June 27th, 2h. 36m. in the evening, invisible in New England; a small eclipse may be seen at New Orleans, and at Austin in Texas, and in some parts of Louisiana, Mississippi and Alabama, and very little at Natchez, Mobile, &c.

II. The second will be an Eclipse of the Moon, on the 6th day of December, in the evening, visible, as follows:

	h. m.	
Beginning,	6 27	}
Middle,	7 20	
End,	8 13	
Duration,	1 43	

Mean time, ev.

Digits eclipsed 2h. 25m. on the Moon's S. limb.

III. The third will be an Eclipse of the Sun, on the 21st day of December, 0h. 25m. morning, invisible in America.

The Planet Venus [♀] will be morning star until the 2d October, thence evening star to the end of the year.

 To find the interest of any particular sum for any certain time, multiply the sum by the number of months, take one half of the product, and you will find the two right hand figures to be cents—the remainder, on the left hand, are dollars, which is the answer. If there be cents in the sum, after you have multiplied as above, you will find the two right hand figures to be fractions, the two next cents, and the remainder in dollars.

ECLIPSES IN THE YEAR 1844.

There will be five Eclipses this year; three of the Sun, and two of the Moon.

I. The Moon will be eclipsed at her full, May 31st, evening, invisible at St. Louis, Natchez, New Orleans, Nashville, Cincinnati, and throughout the greatest portion of the United States; but the Moon will rise at Boston 15m., at New York 8m., at Baltimore 2m., and at Charleston 6m. before the eclipse ends, with a small eclipse on her upper limb, amounting to .2 of a digit for every minute of visibility.

II. The Sun will be eclipsed at the time of the New Moon, June 15th, evening, invisible in the U. States; visible in the S. Pacific and Great Southern Oceans.

III. The Sun will be eclipsed at the time of the New Moon, November 10th, invisible. This eclipse will be visible only in a very small portion of the Great Southern Ocean. Not central on the earth.

IV. There will be a total eclipse of the Moon on Sunday, November 24th, evening, visible, and chiefly so in the United States.

V. There will be a small eclipse on the Sun's northern limb, on the 9th of December, in the afternoon, visible throughout the United States, excepting the south part of Florida.

Morning and Evening Stars.—Venus [♀] will be Evening Star until July 23d, then Morning Star until May 16th, 1845. Jupiter [♃] will be Evening Star until February 29th, then Morning Star until September 21st, then Evening Star until April 6th, 1845.

Showing the difference of High Water at several places from New London.

The sixth column of each monthly page shows the time of high water at New London, New York, Elizabethtown Point, Tarpaulin Cove, Cape Henlopen, Cockspur in Georgia, and Brunswick, in North Carolina—to which if you add and subtract as in the annexed table, you will have the time of high water at the following places. A. shows that the annexed quantity of time must be added—S. subtracted—H. stands for hours—

RATES OF POSTAGE.

For single letters composed of one piece of paper,

	Miles.	Cents.
Any distance not exceeding - -	30	6 $\frac{1}{4}$
Over 30, and not exceeding - -	80	10
Over 80, and not exceeding - -	150	12 $\frac{1}{2}$
Over 150, and not exceeding . -	400	18 $\frac{3}{4}$
Over 400, - - - - -	-	25

Double letters, or those composed of two pieces of paper, are charged with double those rates.

Triple letters, or those composed of three pieces of paper, are charged with triple those rates.

Quadruple letters, or those composed of four pieces of paper, are charged with quadruple those rates.

All letters weighing one ounce avoirdupois, or more, are charged at the rate of single postage for each quarter of an ounce, or quadruple postage for each ounce, according to weight ; and no letter can be charged with more than quadruple postage, unless the weight exceeds one ounce avoirdupois.

NEWSPAPER POSTAGE.

For each newspaper not carried out of the State in which it is published, or if carried out of the State, but not carried over 100 miles, - - - 1 cent.

Over 100 miles, and out of the State in which it is published, - - - - - 1½ cents.

MAGAZINES AND PAMPHLETS.

If published periodically, distance not exceeding 100 miles, - - - - - 1½ cents per sheet.
do. do. over 100 miles, - 2½ do.

If not published periodically,
distance not over 100 miles, 4 do.
do. do. over 100 miles, 6 do.

Small pamphlets, containing no more than a half sheet royal, are charged with half those rates. Eight pages quarto are rated as one sheet, and all other sizes in the same proportion.

All letters transmitted by express mail, are charged triple postage.

*Extract from the Report of the Post Master General,
December, 1842.*

The whole number of free letters sent through the Post Office annually, so far as the returns of Post Masters exhibit, is about 3,000,000.

Assuming 15 cents as the average rate of each letter, if charged with postage, \$450,000 would be the am't. received. Thus it will be seen, that nearly one-ninth of all the matter which passes through the mail passes free of postage. The loss to the Department does not stop here. Two cents are paid to Post Masters on each of those letters, constituting an annual charge upon the revenue of \$60,000.

The revenue of the Post Office Department, for the year ending June 20, 1842, was \$4,546,246 13. The expenditures for the same period, \$4,235,052 11.

☞ Printers of Newspapers may send one paper to each and every other printer of Newspapers within the United States, free of postage, under such regulations as the Post Master General may provide.

Assistants—Laurent Clerc, A. M., William W. Turner, A. M., Luzerne Ray, A. M., Collins Stone, A. M., Jared A. Ayers, A. B., Henry B. Camp, A. B., Lucius H. Woodruff, A. M.

Vice Presidents for Life, by Subscription.

Samuel Appleton, of Boston ; Charles Sigourney and Daniel Wadsworth, of Hartford.

Vice Presidents elected at the Annual Meeting, 1843.

Ward Woodbridge, Thomas Day, Samuel Tudor, David Watkinson, James Ward, Charles Seymour, James B. Hosmer.

Directors—Barzillai Hudson, Seth Terry, Charles Goodwin, Russel Bunce, James H. Wells, John Beach, Amos M. Collins, Francis Parsons, David F. Robinson, Calvin Day.

By the 27th Report of the Directors of the Asylum, made the 13th of May, 1843, it appears that the number of pupils under instruction in the course of the year, was 123, of whom 24 were beneficiaries of Maine, 14 of New Hampshire, 18 of Vermont, 24 of Massachusetts, 17 of Connecticut, 3 of South Carolina, 2 of Georgia, and the remainder, 21 in number, were committed to the care of the institution by private individuals. The aggregate is below the usual average, which the Report ascribes to the prevalent depression of the business of the country, and the additional fact that during a part of the winter and spring of the last year, an epidemic prevailed extensively in several of the Northern States. Prosperity has attended the general concerns of the institution, and health has prevailed among the inmates with but few exceptions. The only death that occurred in the Asylum during the past year, was that of a female pupil between 11 and 12 years of age. At a late meeting of the Board of Directors it was voted, "that the earliest age for the admission of pupils into the Asylum be 8 years ; with the hope that all such as are admitted at an earlier age than 12 years, shall be continued for the term of 6 years at least." The funds of the institution now amount to considerably more than \$200,000. The annual charge to the pupils, for board and tuition, is \$100.

From the 19th Annual Report of the officers of this institution, it appears that their present condition is such, that the public may continue to have the most pleasing confidence that it is still accomplishing much good.

The following statistics may have some interest in the public eye:

“Number of patients admitted since the opening of the institution, 1247. Number admitted during the past year, (ending May,) 83. Number in the insti-

tion during the same time, 172; of whom, 116 are from Connecticut. Number whose insanity is of more than 10 years' duration, 37—of more than 5 years' duration (and less than 10) 13—more than 1, and less than five, 49; less than one year, 62. Number of whose insanity the duration is unknown, 11. Thirty have been admitted between the ages of 25 and 30—a larger number than during any other period of life, of the same number of years—of the different occupations the greatest number, (19) have been "farmers, and farmer's sons." Seventy-six have been discharged during the year, and 89 remain in the Retreat, at the date of the Report. Of the causes, we notice that 19 are attributed to intemperance.
